

PENN NATIONAL RACE COURSE

June 30, 2017

Honorable Russell Redding Secretary of Agriculture COMMONWEALTH OF PENNSYLVANIA 2301 N. Cameron Street

Harrisburg, PA 17110

Kevin O'Toole Executive Director PENNSYLVANIA GAMING CONTROL BOARD P.O. Box 69060

Harrisburg, PA 17106-9060

Dear Secretary Redding and Executive Director O'Toole,

On behalf of Hollywood Casino at Penn National Race Course (HCPNRC) and Penn National Gaming, Inc., it is my pleasure to submit the following report to the Department of Agriculture and the Pennsylvania Gaming Control Board as required under Section 1211(a)(2) of the new table games legislation.

Penn National Gaming, Inc. has more than 40 years of racing heritage that began with the opening of Penn National Race Course in 1972. Today, Penn National Gaming, Inc. continues to be the largest operator to pari-mutuel facilities in North America and stands more committed than ever to horse racing within the Commonwealth.

Throughout 2016 and into 2017 Hollywood Casino at Penn National Race Course continues working to increase the prestige of our racing program and the credibility of our racetrack and the Commonwealth, on both, the local and national stage. The success of our inaugural \$500,000 Penn Mile in its short five year history, demonstrates the excitement that can be generated by our great sport, and our commitment to producing a quality racing product. We look forward to continuing and expanding upon successes such as these in the years to come.

Sincerel

Eric M. Johnston

Director of Racing Operations

Hollywood Casino at Penn National Race Course

# INTRODUCTION

Penn National Race Course opened August 30, 1972 and is the second oldest continuously operating Thoroughbred racetrack in the Commonwealth. Over its 44-year history Penn National has been an innovator and national leader in the pari-mutuel industry.

The Carlino family that took control of Penn National in the early 1980's was able to take this single racetrack and parlay that success into the publicly traded Penn National Gaming, Inc., now one of North America's largest and most diversified gaming and racing companies with annual revenues in excess of \$2.9 billion and 28 facilities in 21 different jurisdictions, including California, Colorado, Florida, Illinois, Indiana, Iowa, Kansas, Louisiana, Maine, Maryland, Massachusetts, Mississippi, Missouri, Nevada, New Jersey, New Mexico, Ohio, Pennsylvania, Texas, West Virginia, and Ontario, Canada.

In aggregate, Penn National's operated facilities feature approximately 36,800 gaming machines, 850 table games, 2,900 hotel rooms and 1.6 million square feet of gaming floor space.

Horse racing and pari-mutuel wagering continue to be an integral part of Penn National Gaming's continued growth strategy. The company is the largest owner-operator of pari-mutuel racing facilities in North America with 11 wholly or jointly owned operations that conduct nearly 1,200 live racing performances annually and processes in excess of \$1 billion in live and simulcast pari-mutuel wagers.

February 2008, ushered in a new era of Thoroughbred horse racing in Central Pennsylvania. Hollywood Casino at Penn National Race Course (HCPN) became the first established racetrack in the state to embrace the legislative intent of Act 71 in creating a fully integrated racing and gaming facility. The \$325 million project featured all new facilities for racing guests, officials and participants.

Since its passage, HCPN has aggressively worked to embrace the legislative intent of Act 71 with respect to stable area improvements.

In 2008, HCPN and the PA HBPA entered into a ten year \$10 million commitment for stable area improvements. In just over 9 years, \$9.5 million has been invested in the construction of new barns, improved electrical and plumbing infrastructure, roadway improvements and compliance with Federal and State manure handling requirements.

In addition to the investments noted above, close to \$5 million in capital improvement projects dedicated to horse racing have been completed comprised of new track maintenance equipment, a new equine ambulance, new stable gate entrance area with additional fencing, a refurbished receiving barn and perimeter fencing, a new Laundromat and Medical Clinic, a new roof on the Chapel, security cameras in the Receiving Barn, 21 new storage trailers for the barns and shadow fencing around the perimeter of the race track. Additionally, working in cooperation with the PA HBPA we have constructed a new groom's dormitory, at a cost of \$800,000, that is designed to house 50 stable area employees.

IICPN is proud of the improvements it has made to its racing surface. Working closely with the PA HBPA new materials used on the dirt track have resulted in a lower rate of catastrophic injuries and a 30% decline since 2009. Additionally, the rate of catastrophic injuries has been at or below the national average the past six years. Also in 2014 we implemented a new acration program for the turf course. The system known as Dry-Ject is a two-phase process that uses water jets to penetrate the

surface of the soil and inject a porous silica sand into the existing growing medium. The first phase "punches" holes on a six inch by six inch grid pattern and penetrates the surface eight to twelve inches deep and injects the silica sand. The second phase injects the silica sand in a fractured pattern to a depth of about four inches. The results of this process are a healthier, faster drying turf course with deeper root growth for extended durability.

As a leader in the pari-mutuel industry HCPN understands the many diverse challenges facing horse racing. These challenges which have gained national exposure and attention are not new, nor unique to Penn National, or for that matter any of the racetracks in the Commonwealth. In its continuing efforts to maintain its leadership role and commitment to racing, Penn National Gaming introduced it's "Horsemen's Guide" (enclosed) in 2011, for all its pari-mutuel facilities. The Guide is updated and revised annually, details national and local integrity standards and clearly states the expectations HCPN has of those wishing to participate and those participating at its facility. The "Guide" is a detailed publication giving horsemen direction and information when racing at Penn National.

Our concern with the humane treatment of our equine population has resulted in a corporate wide policy on horse slaughter with penalties for those who violate the policy. In furtherance of our commitment in this area, Penn National donates annually to various horse retirement programs for the PA HBPA, including New Start, CANTER of PA, R.A.C.E. Fund and ReRun.

Additionally, the Penn National Gaming tracks have been at the forefront of the battle for the adoption of unified medication rules as recommended by the Racing Medication Testing Consortium (RMTC) which would limit the use of therapeutic medications in horse racing, Penn National was also the first Thoroughbred track in the Commonwealth to utilize an independent contractor to administer furosemide (lasix) on race day.

The pari-mutuel industry has endured significant change over the past 20 years, with Pennsylvania being at the forefront in many of these areas.

Intrastate, and then interstate simulcasting exploded in the 1980's and early 1990's bringing greater choice to racing customers and providing new distribution outlets and revenue opportunities to Pennsylvania racetracks and horsemen.

A new breed of Off-Track Wagering (OTW) was developed and perfected in Pennsylvania through track owned OTWs featuring dining facilities and sports bar amenities – shattering the previous, undesirable and now defunct OTB model that had been developed in New York State. Penn National was a trailblazer in the development of OTWs both in central Pennsylvania and, through its prior ownership of Pocono Downs, in the northeastern portion of the state. Over the years the convenience of wagering from home via the phone or internet has grown at the detriment of the OTW's. The expense of the brick and mortar facilities has become burdensome and needs to be closely scrutinized if it is to continue in a profitable fashion in the future.

First telephone account wagering, and later wagering via computers and the Internet, provided yet another valuable distribution tool for Pennsylvania racetracks and were a response to the continuing change in preferences for increased information and access by the horse racing fan. Penn National's Telebet, a live telephone operator service, was one of the first operations of its type in North America.

The evolution of increased off-site distribution forged by Pennsylvania since the 1980's has been emulated in many other states with similar growth trajectories. This cycle of change has redefined the current horse racing business model in many ways from economics to customer wagering and

viewing habits. Given these developments have occurred over a 20-year time span many of these innovations have reached maturity status and are now in decline, both in Pennsylvania and nationally.

Today, handle on horse racing nationally is generated in most jurisdictions not on live racing occurring at the racetrack, but on simulcast horse (or dog) racing being broadcast into these facilities and through off-site distribution channels. The 2017 Jockey Club Fact Book indicated that despite the growth in total handle (up .6% from 2015) only \$1.058 billion (down 0.05% from 2016) of the \$10.74 billion wagered on Thoroughbred Racing in the United States was generated through live racing at on-track sources. (Exhibit 1) The remainder was generated away from the racetrack, in many places by third parties that may or may not have significant links or vested economic interests in the racing industry, adding yet another competitive layer of complexity to the industry puzzle.

Given greater consumer choices and usage channels, and a significant imbalance in terms of supply versus handle and attendance has been noticeable at not only racetracks in the Commonwealth, but across the nation. Again, we refer to the 2017 Jockey Club Fact Book reports on pari-mutuel handle trends, Average Field Size, Starts Per horse and Foal Crops as proof of these continued downward trends (see Exhibit 1).

While being highlighted nationally as a strong racing state, Pennsylvania saw a drop in foal crop, again in 2015. For the fifth consecutive year, the foal crop dropped from a high of 1,533 in 2010 to 669 in 2015. While the North American Foal crop had dwindled as well over the last several years, the percentage of Pennsylvania registered foals has dropped from 5.5% in 2010 to 3.0% in 2015 (see Exhibit 1). Additionally, the number of mares bred and stallions standing in the State of Pennsylvania have also been in decline since 2009 (see Exhibit 1).

These numbers point to Pennsylvania racing hitting a plateau and begin a period of decline. Future growth will be difficult unless changes are made. Pennsylvania Racetracks and Horsemen needs to take a serious look at the number of racing dates that are being conducted in the Commonwealth. A potential circuit among the tracks could help grow field size, increase purses and create a superior product. Field size has unequivocally been shown to have a great impact on handle with larger fields generating larger handles.

Among Thoroughbred racetracks, competition for quality and optimum numbers of available racehorses to fill race cards is a challenge, even with purse (prize) money increasing due to alternative gaming revenue sources. One only needs to look at the above mentioned national and local trends to see the reasons why. The introduction of  $\Lambda$ ct 71 and the significant influx of funding from slot machine gaming dollars to purse and breeders funds has created the opportunity to significantly increase carning opportunities for horse owners, breeders and trainers, allowing Pennsylvania to move up in stature among not only racetracks in the competitive Mid  $\Lambda$ tlantic Region but among tracks on the national landscape as well.

Despite the challenges racetracks face in attracting customers to its brick and mortar facilities, Penn National continues to strategically invest in its facility to expand the market and offer customers and horsemen a first class experience. IICPN made a significant capital investment in a state of the art IIigh Definition Video Production equipment for the production and dissemination of its live racing product. HCPN joins only a handful of tracks across America who have made such a substantial investment to supply superior quality video to its racing fans. Additionally a new graphics package was introduced with the high definition rollout.

With respect to Horsemen issues, Penn National is proud of the relationship it has fostered with the PA HBPA. We have worked with them on a number of major initiatives that we feel will greatly benefit racing in the Commonwealth. Foremost among these is the creation of a stakes schedule in

2013 centered around marquee events and featured the inaugural running of the \$500,000 Penn Mile. This partnership has continued into 2016 with a renewal of the stakes program and the fourth running of the Penn Mile. Additionally, HCPN has partnered with the PA IIBPA in such success events as the Ostrich and Camel Racing and the newly revised World Series of Handicapping. In Part II of the following report, the planning and results of the most recent two runnings of this event will be detailed and we hope this day will continue to succeed in the future and help bolster racing at HCPN and in the Commonwealth as a whole.

The Pennsylvania State Department of Agriculture and the Gaming Control Board have asked racetrack operators in the state to detail the impact of Act 71 as it relates to facility investments and improvements, existing and future marketing and promotional efforts regarding horse racing, on-track attendance for live racing and benchmarks for breeding, racing and handle. Penn National Race Course is pleased to present the enclosed information which illustrates the many diverse impacts of casino gaming on horse racing at HCPN and will be responding in the order as presented by the Department of Agriculture's previously distributed outline.

#### PART I LIVE ATTENDANCE

- Furnish documentation of how the introduction of slot machine gaming at the licensed racetrack has enhanced live racing by increasing live attendance over the calendar year.
  - A. Total attendance statistics daily, monthly and annually

Total attendance statistics for Hollywood Casino at Penn National Race Course (herein referred to as "HCPN") (Grantville) and the two Off-Track Wagering facilities (Lancaster and York) are enclosed (see Exhibit 2) for 2016.

Attendance is presented on a day-to-day basis along with monthly totals. (Exhibit 2)

Annual attendance for each facility is as follows for the past three years:

			2016-2015
	2016	2015	% Change
Grantville	229,651	247,791	-7.32%
Lancaster OTW	32,841	32,469	1.13%
York OTW	40,053	47,453	-15.59%

B. Description of the general demeanor and qualities of facility and amenities.

As of February 2008, Live Horse Racing and Simulcast Wagering have been conducted within the state of the art, \$325 million facility at HCPN. Some of the facility features include:

 Over 70 separate wagering locations with Sportech wagering terminals offering either manned tellers or self-service capabilities.

- Over 110 flat screen, LCD monitors (many of which were replaced in January of 2015) capable of showing High Definition racing and sporting events (where offered.) Live racing from IICPN is now shown on monitors in IID on the casino floor and in the popular Skybox sports bar.
- The 450-seat Mountainview dining room overlooking the racetrack is open every live racing night. Each table includes an individual television monitor with many also offering touch screen, table top wagering machines.
- Our box seat area accommodates 256 guests. Public seating is available to the general population free of charge with box seats available for sale on a nightly or annual basis.
- The 150-seat simuleast tele-theater features individual handicapper work stations, 24 55" flat-screen LCD monitors, 12 additional 32" flat-screen TVs and 16 tabletop wagering terminals and a food service area.
- The Paddock Café, an 80+ seat lounge located adjacent to our Paddock/Walking Ring features wagering terminals, program sales, flat-screen televisions, a food court and easy access to the box seats and Mountainview dining.
- An expansive outdoor apron area provides up-close viewing of the Paddock and racing for guests with dozens of picnic tables and other scating options. There is easy access to expanded wagering terminals. Increased food and beverage options have been implemented over the last year, including a food truck on the apron that is open weekends over the summer.
- The \$200,000 stairway from the box seats and Mountainview dining room to the Paddock Café area was added in 2011 and affords customers and horsemen easy access to the paddock and walking ring area.
- On the racing side, HCPN offers a one-mile dirt track, a sevencighths mile turf course (the first one constructed in the state) and offers year-round stabling for approximately 1,100 horses in 25 barns. As part of its agreement with the PA HBPA to conform to the backstretch improvement provisions of Act 71, HCPN has constructed 14 new barns since mid-2008. HCPN entered into a 10-year, \$10 million backstretch capital improvement program in consultation with PA HBPA.

## Description of appropriate signage and information so patrons can easily access and utilize racing facilities.

Exhibit 3 provides photographs of some of the signage within the HCPNRC facility relating to horse racing. The integrated racing and gaming facility provides easy access from the first floor gaming area to the second and third floor dedicated racing sections. In addition, the facility has convenient and direct access off the easino floor to the outside racing areas.

Guests of the racetrack can conveniently park in the modern 2,500 car parking garage which provides direct access to the second floor Mountainview Dining Room and Simulcast Teletheater level facilities and to the third floor box seat level.

#### D. Description of changes to physical plant.

The original grandstand building at HCPN was razed in 2006 and was replaced in its entirety with a \$325 million state of the art, integrated racing and casino gaming facility. All amenities for racing guests, racing officials and jockeys were part of this new construction.

HCPN introduced Table Games in July 2010 Currently there are over 2,400 slot machines on the gaming floor in addition to 64 table games and 16 poker tables. Television monitors dedicated to horse racing are located throughout the casino.

In 2015 HCPN, in cooperation with the PA HBPA opened the newly constructed \$775,000, 25 room, 50 bed grooms' dormitory. The climate controlled facility offers accommodations for men and women and a common area for social gatherings. To date the facility is approximately 55% occupied.

In 2016, HCPN complete the construction of another new barn, at a cost 0f \$500,000 bringing the total number constructed since 2008 to 14.

Other upgrades and improvements for 2016; \$310,000 for three new John Deere Tractors, \$44,500 to replace the turf rail with a new Duralock Safety Rail, \$6,800 to upgrade our Champion Grader for racing surface management, \$9,500 for non-skid epoxy floor treatments in the Jockey's Room and \$12,300 to replace race track access swing gates with sliding roller gates. Additionally, HCPN has begun a project to replace the existing film patrol cameras with remotely operated cameras. To date two of the six cameras have been replaced at a cost of \$35,000 with the balance scheduled for 2017.

 Describe plans to improve attendance at licensee's racetrack over the successive calendar year in addition to a marketing plan that includes:

#### A. Planned promotional programs to attract patronage

Beginning in 2013, HCPN restructured its stakes program to create two "Marquee Event Days", Penn Mile Day (run between the Preakness Stakes and the Belmont Stakes) and The Holiday Racing Festival, formerly known as Fabulous Strike Day (run in late fall). Marquee Event Days such as the Breeders' Cup, Maryland Million Day, Charlestown Classic have been proven across the racing industry to increase awareness and excitement, both locally and nationally for the host track. Awareness of this type has become extremely important as almost 90% of live handle is generated by off-track simulcast facilities.

In 2012, the open HCPN stakes schedule consisted of 12 races, all with purses between \$75,000 - \$200,000, and split out over five days. In contrast, the 2016 HCPN stakes schedule was a radical departure, consisting of six open stakes races split over only two days, including three \$200,000 stakes races, and the premier race for HCPN, the \$500,000 Penn Mile. The idea being that in order to make a splash on both a regional and national level, it would be necessary to create a day that could lure some of the top horses, trainers, and jockeys in the country to HCPN.

HCPN continues to put a major marketing and advertising efforts behind the Marquee Event Days, including advertising nationally with the following major print, online, and TV outlets: Daily Racing Form, Paulick Report, Horse Racing Radio Network (IIRRN), TVG2, Indian Charlie Industry Newsletter and the Racing Biz. Locally, the Penn Mile was advertised in the Patriot News, on select Cumulus Radio stations, online at <a href="https://www.hcpn.com/racing">www.hcpn.com/racing</a>, via on-track signage (starting gate, finish linc, building, racing program), and also via the HCPN international simulcast TV feed.

The inaugural Penn Mile Day was a rousing success. The race attracted three graded stakes winners, a horse from the Kentucky Derby, and four of the best jockeys in the country – Hall of Famers John Velazquez and Edgar Prado, 2013 Kentucky Derby winning jockey Joel Rosario, and Javier Castellano. The impressive winner was Rydilluc for trainer Gary Contessa.

HCPNRC shattered all of its previous handle records. All-sources wagering on the Penn Mile race itself was \$1,139,478, making it far and away the largest single-race handle in the 40-year history of the track. The previous record was the Pennsylvania Governor's Cup Handicap on August 1, 2009, which handled \$377,365.

Total all-sources wagering on the entire ten-race card at Penn National was \$3,658,996, shattering the previous all-sources handle record for a single card of \$2,173,921, which was set on December 26, 1998.

The second renewal of Penn Mile Day, on May 31, 2014, saw similar successes, attracting numerous graded stakes winning horses such as, eventual winner,

Bobby's Kitten, who went on to win the prestigious 2014 Breeders' Cup Turf Sprint and propel the Penn Mile to Grade 3 status by the North American Graded Stakes Committee, an achievement rarely done in just two runnings.

The third running of the Penn Mile (first with Graded Status) on May 30, 2015 set the new standard for racing at HCPN by attracting horses from every major racing jurisdiction in the U.S., such as Kentucky Derby contender Ocho Ocho Ocho and Papacoolpapacool from California, My Point Exactly from Florida, Granny's Kitten and Tuba from Kentucky and eventual winner Force the Pass from New York.

The full fields and quality, competitive races forged the way for a setting NEW single race and single day handle records \$1.25mm and \$3.86mm respectively.

The fourth running of the Grade 3 Penn Mile on June 4, 2016, attracted one of the most competitive fields of horses ever run at Penn National including the Breeders' Cup Filly Juvenile Turf Champion Catch a Glimpse. On her way to her sixth consecutive Graded Stakes victory, the Mark Casse trained filly out ran six other horses representing some of the most recognized owners, trainers and jockeys in the industry, including trainers Todd Pletcher, Mike Make Thomas Albertrani, Chad Brown and jockeys Florent Geroux, Joel Rosario and Javier Castellano.

As a result of attracting and or producing four Grade 1 winners (Bobby's Kitten 2014, Force the Pass 2015, Catch a Glimpse and Beach Patrol, 2016) the Penn Mile was elevated to Grade 2 status.

The 2017 edition of the Penn Mile, now as a Grade 2, was not a disappointment as it attracted some of the best turf three-year-olds from both coast, including California invaders Big Score and Cistron for trainers Tim Yaykeen and John Sadler, respectively. But the honors of the day went to the east coast as Frostmourne came from off the pace to win the Mile for trainer Christophe Clement.

As usual the Penn Mile Day card attracted the best of the best, including jockeys Irad Ortiz, Javier Castellano, Edgar Prado, Paco Lopez, Luis Saez and Tyler Gaffalione and trainers Todd Pleatcher, Mike Maker, George Weaver, Linda Rice, Mary Eppler, Peter Miller, Michael Dini and Graham Motion.

The Penn Mile card was redesigned with an earlier 3:45pm first post and the rescheduling of three Pennsylvania Bred Stakes Races. The earlier post allowed us to keep the 6:00 to 8:00pm time slot carved out over the last several years for the four traditional Penn Mile Day stakes, while permitting us to run the remainder of the program as the under card. This change was overwhelmingly and enthusiastically accepted by our fans as they came out in droves and wagered over \$3.2 mm, the third largest all time handle for HCPN.

HCPN looks to continue building on the success and excitement generated by the Penn Mile in the coming years.

The second of two major stakes nights planned for 2016, The Holiday Racing Festival was also a great success and was well supported by the betting public with a total handle for the day in excess of \$1.8 million. The Fabulous Strike stakes drew eleven of the most talented sprinters, joekeys and trainers on the east coast.

Once again, the Ostrich and Camel races were one of the biggest attractions in 2016 and continued into 2017. This annual event has become a fan favorite as patrons literally filled the trackside apron, in what was described by one long time employee as the "largest crowd on the apron since the concerts in the late seventies" The 2016 event duplicated the success, drawing families and non-racing fans to the facility for the first time.

#### Additional promotional activities currently planned are as follows:

- The Budweiser Clydesdales will be on track on late June and are always a crowd favorite.
- Penn National continues its agreement with the Television Games Network "TVG", the largest broadcaster of live racing in the country showing IICPN races and giving the racing product expanded coverage.
- The World Series of Handicapping (WSH) is the oldest handicapping contest in the country (started in 1977) and for 2016 has expanded to include satellite qualifying tournaments that will lead to a final event in November which will award two berths to the National Handicapping Championship to be held in January 2017 in Las Vegas.
- IICPNRC has hosted several editions of the FERENTRI (International Federation of Amateur Riders) events
- IICPN, its OTWs and Ebet/Telebet have a guest loyalty program "Players
  Choice" where guests may earn points redeemable for wagering vouchers and
  programs/handicapping materials. Approximately 30% of total handle annually
  is tracked through this program.
- In order to heighten the on-track excitement for the Triple Crown, HCPN
  offers special promotions and restaurant offerings during each leg, the
  Kentucky Derby, Preakness, and Belmont Stakes.

In 2012, HCPN launched a new online Advanced Deposit Wagering (ADW) site, <a href="www.cbetusa.com">www.cbetusa.com</a>. Based on the success of EBetUSA, HCPN has created and will transition to a new ADW platform, <a href="www.hollywoodraces.com">www.hollywoodraces.com</a> in 2016. The new hollywoodraces.com will offer a multitude of new features and improvements to provide for a more customer friendly experience including a refreshed look and home page as well as a mobile app available for both I-phone and android users.

Please see Exhibit 4 for various items related to the Penn Mile, Holiday Racing Festival, The World Series of Handicapping and other promotional events,

including advertisements, on-track signage, previews of races, photos and recap articles.

#### B. Plans for public awareness and outreach

Please see Part I, Section 2 to read about many of the public awareness and outreach plans IICPN put into motion.

- In 2015, HCPNRC began a "Grass Roots" community awareness and promotional program with charitable organizations such as Susquehanna Service Dogs, R.A.C.E. Fund Horse Retirement and Manada Creek Pony Club. Charitable Organizations are invited to attend and promote their programs on our major racing days in exchange for their messaging their social media followership about their attendance at the event.
- Additionally, in 2016 HCPN expanded the Ostrich and Camel racing program to include Charitable Organizations from Dauphin, Lebanon and Schuylkill Counties. Those charities include Sexual Assault Resource and Counseling Center, Domestic Violence Intervention of Lebanon County, Hamilton Healthcare Baby Love Addiction and Pregnancy Services and Schuylkill Women in Crisis.
- Also in 2015, HCPN introduce the Saturday Sunrise program in cooperation with the PA HBPA. The program scheduled for one Saturday morning each month during the summer, invites racing fans of all ages to come out and watch morning training and meet owners, trainers and jockeys in a casual setting while enjoying a free continental breakfast. This program continues through 2016 and has drawn a mixed crowd of racing fans and perspective owners.
- HCPN continues to utilize social media such as Facebook, Twitter and YouTube pages to help promote the racing product. The Facebook page, in particular, has been greatly received by fans, with numerous updates each week and lots of fan interaction (see Exhibit 5)
- HCPN continues to advertise its big horse racing events in the Patriot-News, a Harrisburg newspaper with a circulation in excess of 490,000 readers. This advertising is utilized to help promote specific big racing events at Penn National like the Penn Mile this past June (see Exhibit 4).
- IICPN sends out monthly mailers to approximately 50,000 people and cach mailer contains information about racing.

## Proposed changes to physical plant (if any)

Please see Part I, Section 1.

#### PART II HANDLE

- Furnish documentation of how the introduction of slot machine gaming at the licensed racetracks has enhanced live racing by increasing live handle over the calendar year. Please include the following:
  - A. Total amount of live handle wagered on races conducted by licensee.
    - On-track
    - Off-Track
    - Account Wagering
    - Other Guest Locations

Please see Exhibit 6 for detailed statistics for On-site handle categories for calendar years 2016, 2015, 2014, 2013, 2012, 2011, 2010 and 2009 and for Other Guest Locations (Export Handle).

- B. Total amount wagered on simulcast races received by the licensee
  - 1. On-Track
  - Off-Track
  - Account Wagering

Please see Exhibit 6 for detailed statistics in all the above mentioned categories for calendar years 2015, 2014, 2013, 2012, 2011, 2010 and 2009.

Describe plans to increase live handle and simulcast handle with both licensee and at guest locations. UPDATE

Please see Exhibit 6

All-sources handle on races run at Hollywood Casino at Penn National Race Course in 2016 decreased 8.77% to \$156,212,756 versus the \$171,243,040 wagered in 2015. While total handle decreased for 2016, Total On-site Handle from all sites and sources increased 6.78%. Despite an increase in the total number of races run in 2016 and average field size remaining flat at 7.5 horses per race, the Export Handle dropped 8.19%. The majority of this decrease can be attributed to the reduction of national television distribution when HRTV was sold to TVG and rebranded as TVG2 in late 2015. Since that, HCPN reached an agreement with TVG to provide its signal in High Definition. Through this agreement, struck in November 2016, HCPN has seen increases in television dissemination and increases in export handle.

#### PART III NATIVE BREEDING INDUSTRY UPDATE

- Furnish documentation of how the introduction of slot machine gaming at the licensed racetrack has enhanced live racing by increasing the number of PA-bred or PA-sired horses participating in races at track over the calendar year. Please include the following:
  - A. Total of individual PA-bred/sired horses competing at racetrack, total number of starts these horses made and total purses earned.

In 2016 a total of 1,181 individual PA-bred/sired horses competed at Hollywood Casino at Penn National Race Course. These horses won 603 races, made a total of 5,118 starts and earned \$14,454,483. While reduced from the numbers seen in 2015, PA Bred horses continue to win 39.57% of the races contest at IICPN.

B. Percentage of the whole that these PA-bred/sired horses contribute to the total number of horses competing at its track, the percentage of the whole as to total number of starts made, the percentage of the whole of purses earned.

Statistics are not kept as to individual horses competing at HCPNRC. In 2016 a total of 11,444 starts were made at HCPN, PA-bred/sired horses made up 44.72% (down slightly from 2015 at 47.82) of that total. Total purses distributed at HCPN in 2015 were \$29,225,950 with PA-bred/sired horses earning \$14,454,483 or 49.46%.

C. Total number of races restricting entry to PA-bred or PA-sired horses and total purses paid in restricted races.

In 2016 a total of 200 races were restricted to Pa-bred/sired horses. There were 195 overnight races and 5 stake races for a total purse distribution of \$6,038,300.

Exhibit 7 documents information regarding PA-bred/sired races from 2007 through 2016. Information for these statistics was provided by the Pennsylvania Thoroughbred Breeders Association and the HCPN Horsemen's Bookkeeper utilizing information provided by InCompass Solutions.

 Describe plans to increase participation of PΛ-bred or PΛ-sired horses and total purses paid in restricted races.

As is clearly evident by the number of races written and won by Pennsylvania bred horses in 2015and 2016, HCPN has, and will continue to be, an active partner with the Commonwealth's Thoroughbred Breeders and Horsemen in the promotion and advocacy of state-bred racing opportunities. HCPN desires a strong PA-bred racing program that can produce an adequate quantity of quality racehorses that are competitive not only against other PA-bred horses, but also against open company. A strong PA-bred program benefits all facets of the horse industry in the state and stimulates interest among the wagering public.

In addition to being an active member of the PA Breeders Advisory Committee, HCPN offers many advantages to state-bred/sired horses competing here on a year-round basis. Those current advantages include:

- In concert with the PA HBPA and the PA Breeders, HCPN put on PA Owners
  Appreciation Day in September of each year, with all races having enhanced purses
  and preference to horses that have a history of racing at HCPN.
- The 2016 PA Owners Appreciation Day on Saturday, September 24, included purse enhancements equal to an additional 50% per race category. The enhanced purses allowed us to conduct 10 quality races with full fields and offer preference to the horsemen that support the HCPN racing program, on a daily basis.
- Each Penn Mile Day, stakes and overnight races restricted to PΛ Breds are carded to help promote on a national stage the best horses and stallions that PΛ has to offer.
- At least two (2) races per day in the Condition Book written exclusively for PA-bred horses;
- Per statute, any race with at least eight (8) separate PA-bred entrants is closed exclusively for PA-breds;
- PA-breds receive preference in entering of horses at HCPN;
- A 20% additional bonus in purse money for owners of a PA-bred horse competing at HCPNRC.

Opportunities for PA-bred horses at IICPN continued to on pace in 2016 as a percentage of the total racing product despite the reducing the total number of races. A total of 200 races were carded exclusively for PA-bred horses — six times the number of racing opportunities for PA-breds since 2007.

HCPN is extremely appreciative of the role the PA-Bred horses have taken by becoming an increasing portion of our racing product. In this time of constriction in the industry, it is a testament to the PA Breeders' hard work, as the PA-Bred horses going to the race track are one of the few growth sectors in the industry.

HCPN requests that the Racing Commission and Gaming Board contact the PA Breeders Association and request any additional information it deems important to supplement information that may have been omitted from this report. In addition, HCPN welcomes any feedback and proactive actions by the Thoroughbred Breeders to stimulate horse ownership and interest.

### PART IV CLASS

- Furnish documentation of how the introduction of slot machine gaming at the licensed racetrack has enhanced live racing by improving the quality in the class of races over the calendar year. Please include the following:
  - Type of race
  - Number of Races
  - Number of Starters

#### Purses Paid

See Exhibit 8 for a detailed chart of this information from 2007 (pre-slot machine gaming at PNRC) through 2016.

Also included is a chart of Claiming Activity (Exhibit 8) at HCPN from 2007 through 2016. This benchmark shows that there is still a strong interest in ownership of racehorses and that the economics of horse ownership are geared towards allowing individuals to invest in the industry through the claiming route. The number of claims has increased almost 200% from 2007 to 2016, dollars spent on claims has increased 300% from 2007 to 2016. The quality of races is also shown significant increases in the average claiming price from 2007 to 2016.

#### Describe plans to improve class of horses in races for successive calendar year.

Since 2007 average daily purse distribution has increased from \$70,000 to \$188,000 in 2012. In 2014 the average daily distribution began dropping to \$165,000 and eventually settled at \$148,000 per day in 2015 and 2016, as purse revenues from all sources faced increasing pressure and competition. The early increases in daily purses has brought an influx in not only an increased quantity of horses to race at HCPN, but a noticeable improvement in the overall quality of horses competing at the racetrack. This quality has not wanted despite the decreases in 2014 and 2015 and actually continues to grow in 2016 as evidenced by the increase in the number of allowance and optional allowance races run year over year. This is illustrated in Exhibit 8.

HCPN has been transitioning its racing program from a predominately lower level claiming/conditioned racing product to a mid-level claiming and allowance racing format. New trainers and horses from around the country have applied and received stalls and interest continues to be high with new racing operations arriving daily. HCPN works closely with the PA-HBPA in order to create a balanced racing program and equitable purse distribution. Many of the lowest level claiming categories have been eliminated, and efforts will continue to refine the qualifying conditions throughout 2016 and going forward.

In 2012 HCPN and the PA-IIBPA agreed to, the largest stakes program at IICPN in over a decade. This included the richest race ever at HCPNRC, the \$500,000 Penn Mile, as detailed in Part I, Section 2. In 2015, the open stakes program was \$1.4 million, a slight reduction from the \$1.45 million offered in 2012 and 2013, but still ahead of the \$1.3 million in 2011 and \$720,000 in 2010. The 2016 the stakes schedule was scaled back slightly in value to stay consistent with the reductions in available purse dollars. HCPN is still in the lower echelon within the region in allocation of total available purses for stakes.

Despite the larger purses in recent years, HCPN must still compete against many other regional racetracks with enhanced purse supplements as well as large overlaps in racing dates. Competition in the Mid-Atlantic region is fierce for available, quality horses, with 11 thoroughbred racetracks within a four-hour radius of HCPN.

Even with the influx of available purse funds over recent history, trends in Thoroughbred breeding and training philosophies are cutting down on the number of horses available to race. This trend will cause continued problems for all racetracks going forward to offer competitive, quality races with adequate field sizes to generate wagering interest from racing customers. Through 2012, 2013, 2014 and 2015, national field size took a precipitous drop and continues to be a major concern on a daily basis.

Through 2016, average field size for the year at HCPN was 7.50, an increase over 2014 and equal to 2015, but as mentioned earlier, driven by reduction in total number of races.

HCPN, and Penn National Gaming strongly believes that the horse racing industry, not only in Pennsylvania, but in the Mid-Atlantic region and nationally must seriously look at the number of live racing dates being offered, the available horses to fill those race cards and come to some coordinated effort to improve the wagering handle on races while also balancing the economic realities of horse ownership. Racing date mandates based on artificial numbers, not marketplace realities are detrimental in the long run in producing a quality product which is attractive to the wagering public.

HCPN is willing to take a leadership role in this area but needs the cooperation of other tracks, horsemen and racing commissions in order to make this effort succeed. To that end Penn National is involved in discussions with other Mid-Atlantic racing entities regarding coordinating stakes, racing dates and condition book information.

#### PART V. RESIDENCE

- Furnish documentation of how the introduction of slot machine gaming at the licensed racetrack has enhanced live racing by increasing the number of PA residents participating in the Commonwealth's racing industry throughout the calendar year. Please include the following:
  - Λ. Number of PA residents participating at the track as owners and trainers

In 2016 a total of 700 individuals listed as owners and/or trainers had registered accounts with the HCPN Horsemen's Bookkeeper with a Pennsylvania address. Another 91 Jockey accounts had PA addresses.

Exhibit 9 details the PA/Non-PA resident information for participants in racing at Penn National Race Course from 2007-2016.

 Percentage of the whole that PA residents contribute to the total number of owners and trainers.

In 2016 there were a total of 2,065 registered owners-trainers in the Horsemen's Bookkeeper system. PA residents accounted for 33% of those accounts (700).

In 2016 there were a total of 230 Jockey Accounts with 91 (38%) being PA residents.

Exhibit 9 details the PA/Non-PA resident information for participants in racing at Penn National Race Course from 2007-2016. C. Total purse earnings of PA residents at track of owners (as determined by address of stable or lead owner) and trainers,

PA resident owners-trainers earned \$15,213,878 in purses in 2016 at HCPN. Total earnings by PA resident jockeys at HCPN in 2016 were \$2,228,325.

Exhibit 9 provides a breakdown of PA and Non-PA resident accounts for Jockeys and Trainers/Owners in our Horsemen's Bookkeeper System for 2007 through 2016.

 Estimated amount of purse earnings of non-PA residents stabling horses at the track.

This is not an easily identifiable number, however, of the 85 individual trainers currently stabled on the grounds of IICPN, a total of 74 (87%) are PA residents.

 Provide strategy to increase participation of Pennsylvania residents in the PA racing industry for successive calendar year.

HCPN feels that many of the improvements to the physical plant in the clubhouse, grandstand, and backstretch, have made HCPN more attractive for horse owners. Without question the influx of increase purses from Slot Machine Gaming has greatly benefited horse owners in making the cost proposition of horse ownership more attractive.

The creation of our marquee stakes events, like the \$500,000 Penn Mile, detailed in Part I, Section 2, and days like PA Owners Appreciation Day and detailed in Part III, Section 2, are focused on raising the profile of HCPN to PA residents in addition to providing them with additional opportunities to race horses bred in the Commonwealth and sired by stallions currently standing in the Commonwealth.

The statistics in Part III (Native Breeding Industry) clearly demonstrate that we are a leader in the Commonwealth in terms of opportunities on a daily basis for Pennsylvania-bred horses to compete for excellent purses. It follows that the majority of those racing PA-bred horses will be PA residents.

HCPN feels that programs designed for horse ownership should also be a priority of the PA-HBPA and the Pennsylvania Thoroughbred Breeders. Seminars on ownership, meeting individuals such as trainers and breeders, tours of facilities, websites or information brochures on how to become and owner or how to purchase a racehorse are all opportunities that could be explored and have been utilized successfully at other racetracks and jurisdictions. HCPN would be happy to work with the PA-HBPA and the Thoroughbred Breeders on constructive programs to encourage horse ownership in general, and specifically to PA residents.

While we fully understand the intent to focus on the benefits of the racing program at IICPN towards existing residents of the Commonwealth, we hope that the Department of Agriculture, the Gaming Board and elected officials take a much broader view of the impact of slot machine gaming, and table games, on the horse racing industry in Pennsylvania.

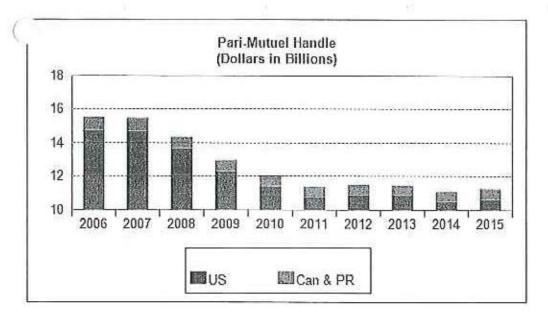

Out-of-state owners and trainers make purchases in Pennsylvania, pay taxes in the state and employ individuals who work in the state. If their experience is a positive one, these out-of-

state residents will expand their commitment to Pennsylvania racing or may soon become permanent residents of the Commonwealth and establish even stronger economic ties to the state. Given HCPN's close proximity to Delaware, Maryland, New Jersey, New York, Virginia and West Virginia we are fortunate to have a steady influx of horsemen, owners, breeders and jockeys competing at our facility. This influx is positive for the overall racing program in creating diversity and improving the quality of the racing, which may grow attendance and handle. These out-of-state individuals will also purchase PA-bred horses, stable, board and breed their horses in the state, claim horses at PA tracks from PA-based trainers and owners and provide significant value to the racing programs at all PA racetracks. We view all of these activities as beneficial in the long-term for the Commonwealth of Pennsylvania.

HCPNRC and Penn National Gaming, Inc. greatly appreciate the opportunity to address both the Pennsylvania State Horse Racing Commission and the Pennsylvania Gaming Control Board in detailing our past, current and future efforts as it relates to the investment and improvement of horse racing at Penn National Race Course and for horse racing in general in the Commonwealth.

<sup>\*</sup> Estimated figures

Foal crops are estimated against Reports of Mares Bred, scheduled to be filed by Aug. 1 of each breeding season. Foal registration is to be completed within 12 months of the birth of the foal. However, late registration is available for additional fees, making actual foal crop counts impractical before Dec. 31 of the crop's 2-year-old year, the time by which the vast majority of the foal crop has been registered.

#### Footnotes

FROSTMOURNE broke sharply then was taken well in hand, bided his time three wide, swung four wide into the stretch while moving, responded to urging and quickly ran clear into the final sixteenth. BIG SCORE was unhurried between horses, raced two wide into the final turn, swung three wide into the stretch and finished gamely outside. CISTRON pressed two wide outside the early leader while;e in hand, took over in early stretch but was little match through the final sixteenth. MO MAVERICK raced in good position outside, gave his best three wide into the stretch then weakened. HOLIDAY STONE was unhurried, raced two wide between horses around the final turn, bumped with TIME TO TRAVEL while trying to rally between horses into the final sixteenth then continued evenly, BRONSON wasn't far back inside to the stretch, swung out between horses to avoid tight quarters entering the final sixteenth but couldn't gain. TIME TO TRAVEL made the early pace along the rail then drifted while weakening in midstretch, bumped with HOLIDAY STONE and faded. BONUS POINTS stayed inside and failed to menace, PRIZE FIGHT was outrun outside,
